Vision

Karmax Corporation shall be a professionally managed, committed to total client satisfaction company.

Mission

Karmax Corporation shall foster a culture of caring, trust and continuous learning while meeting expectations of customers and employees

OUR PHILOSOPHY

- **Undertaking our responsibilities to boost productivity, this helps in fulfilling our client's requirements in the best possible way.**
- **Utilizing our resources cautiously and effectively hence making us successful at every stage.**
- **Acknowledging the fact that our employees are experts in their fields of responsibilities, we support them to take the right decisions.**
- **Constantly adapting to latest global developments helping us to deliver quality services.**
- **Being pro-active to achieve team goals hence meeting ultimate client satisfaction.**
- **Employees are been regularly updated & trained about work & safety procedures.**

KARMAX OVERVIEW OF REFRACTORY LININGS

WHAT DOES REFRACTORY LINING MEAN FOR US?

- We at Karmax Corporation having a committed team, believe in each new project as a Positive Challenge and are Extremely Passionate about our work which in-turn highly satisfies our clients without compromising quality and safety of the work.

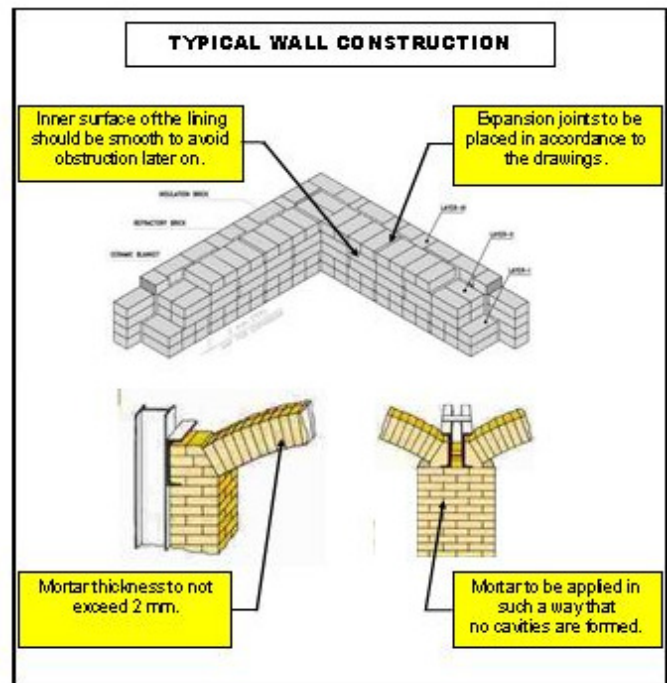

SOME FEATURES OF GOOD REFRACTORY LINING !

Its not uncommon for significant challenges to appear during a typical refractory installation project. However some of the features of a Good Lined Refractory are:

- Extended Refractory Life
- Better Installation of refractory reduces routine maintenance
- Low maintenance cost of the Refractory
- Low maintenance, Low number of Safety Issues
- Protection against Lost Production

IDEAL REFRACTORY LINING !

- Work in accordance to drawings and design with proper planning.
- Understanding the proper refractories to install at the right place.
- Usage of correct Mortars for related bricks.
- Understanding the correct way to install refractories.
- Usage of Potable Water for mixing.
- Preventing wastage of refractory materials.
- Required Temperature to be maintained during installation of Castable.
- Referring Datasheets of each refractory.
- Keeping Expansion Joints as per the drawings
- Performing the work in a safe and efficient manner.
- Adhering to proper refractory maintenance procedures.

KARMAX BRIEF SAFETY PROCEDURES

KARMAX CORPORATION believes in On-Time Delivery of the job where Quality of the job and our Worker's Safety is NOT compromised.

Our Safety supervisor would constantly be in-tune with the site supervisor to provide a healthy and hazard-free environment for the workers to work.

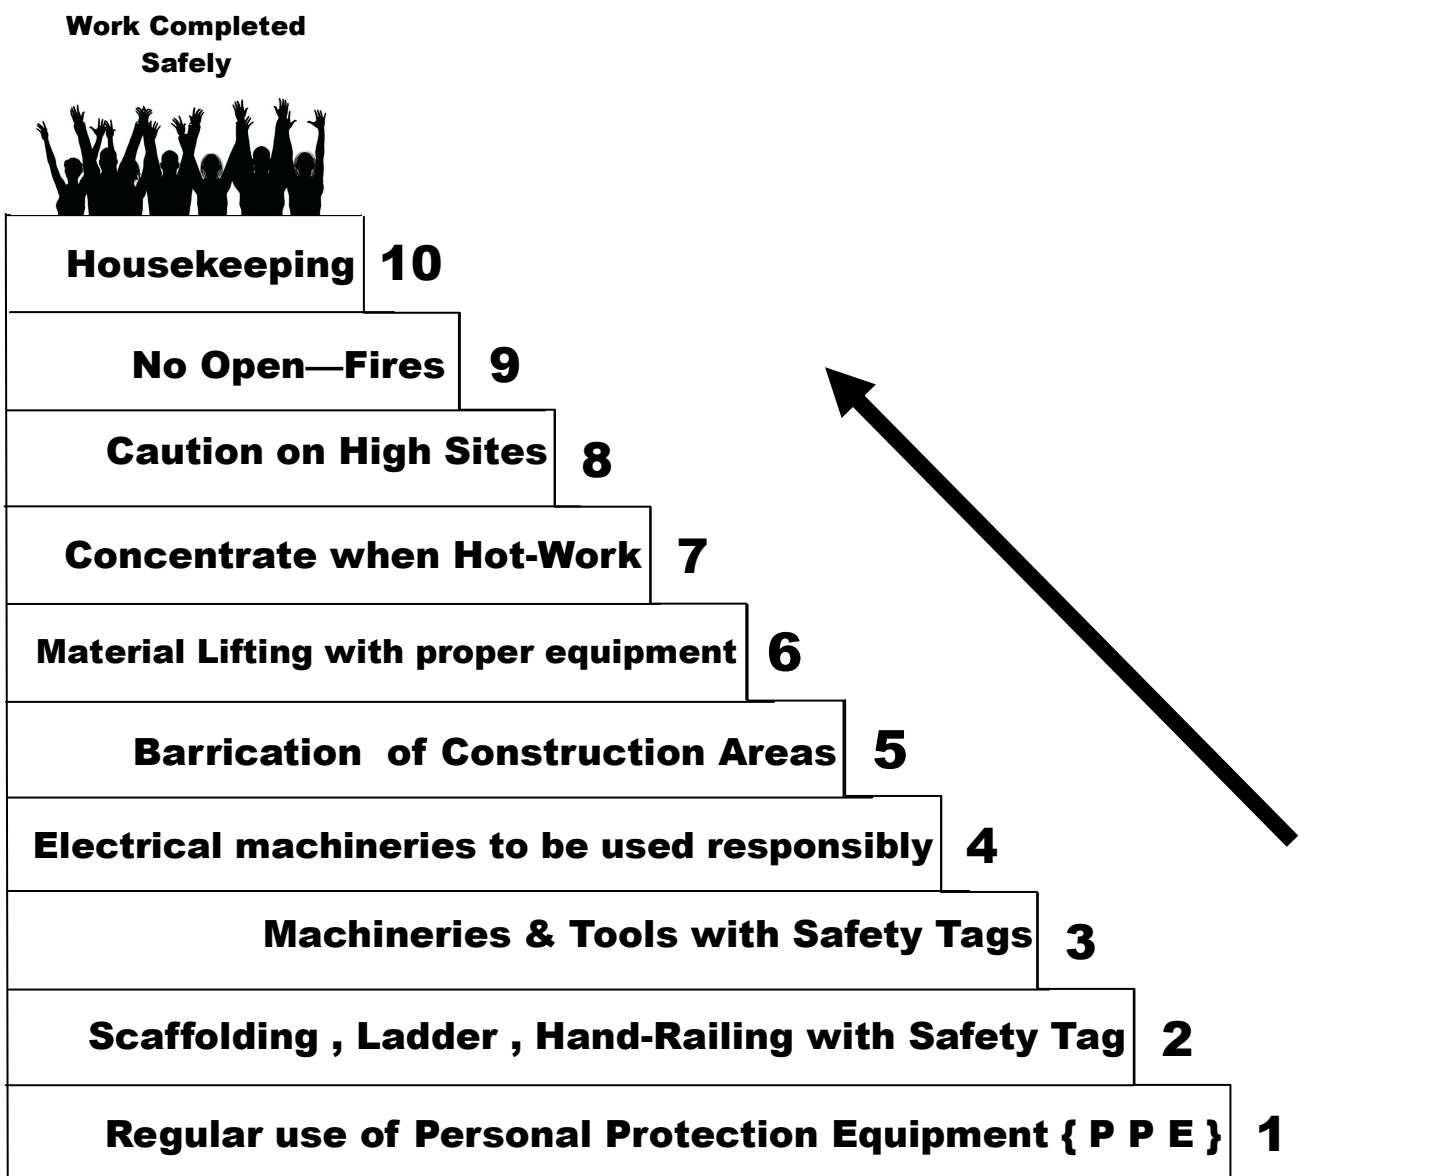

Our designated safety supervisors would be present round the clock on the site and bring to notice any safety violations and hazards to our site supervisors on daily basis.

The Site safety supervisor would regularly conduct safety training with all workforce.

THE **KARMAX** SAFETY LADDER

🙌 **10 Steps to a SAFE JOB** 🙌

KARMAX SAFETY RULES

1. Personal safety equipment must be worn as prescribed for each job, such as: safety glasses for eye protection, hard hats at all times within the confines of the construction area where there is a potential for falling materials or tools, gloves when handling materials, and safety shoes are necessary for protection against foot injuries.
2. Watch where you are walking. Don't run.
3. Keep your mind on your work at all times. No horseplay on the job. Injury, termination or both can be the result.
4. The use of illegal drugs or alcohol or being under the influence of the same on the project shall be cause for termination. Inform your supervisor if taking strong prescription drugs that warn against driving or using machinery.
5. Lift correctly - with legs, not the back. If the load is too heavy GET HELP. Stay fit. Control your weight. Do stretching exercises. Approximately twenty percent of all construction related injuries result from lifting materials.
6. Precautions are necessary to prevent sunburn and to protect against burns from hot materials.
7. Do not distract the attention of fellow workers. Do not engage in any act which would endanger another worker.
8. Know where firefighting equipment is located and be trained on how to use it.
9. A good job is a clean job, and a clean job is the start of a safe job. So keep your working area free from rubbish and debris.
10. Never work aloft if you are afraid to do so, if you are subject to dizzy spells, or if you are apt to be nervous or sick.
11. Do not use power tools and equipment until you have been properly instructed in the safe work methods and become authorized to use them.
12. Do not enter an area which has been barricaded.
13. Nobody but operator shall be allowed to ride on equipment unless proper seating is provided.
14. Never oil, lubricate, or fuel equipment while it is running or in motion.
15. Never throw anything "overboard." Someone passing below may be seriously injured.
16. Keep ladder bases free of debris, hoses, wires, materials, etc.
17. Before servicing, repairing, or adjusting any powered tool or piece of equipment, disconnect it, lock out the source of power, and tag it out.
18. Do not use a compressor to blow dust or dirt from your clothes, hair, or hands.
19. Open fires are prohibited.
20. Barricade danger areas. Guard rails or perimeter cables may be required.

Specialist in : Specialized in GLASS industry.

Pan Card No. : ADGPH 7396K

INTRODUCTION

It gives us immense pleasure to introduce ourselves as more than just Leaders in the Refractory Application sector; boasting years of local as well as international expertise and hiring skilled and semi-skilled manpower to execute our projects.

The company has been actively functional for more than a decade now, dating back to 2007. Since then, our growth has been exponential to which our satisfied customers stand a testimony.

Some of our Satisfied Clients

We do all kinds of refractory jobs such as brick lining, castable lining, acid proof lining, ceramic blanket lining, module fixing etc. in all types of plants such as cement plants, glass plants, steel plants, refineries, sponge iron, boilers, fertilizers, gas plants etc. .

We are specialized in GLASS Industry, having competent teams (including supervisors, masons, carpenters, electricians, welders, helpers) to execute the job in accordance to the drawings & designs, fulfilling our customers requirements around the globe.

We major in green-field projects, shutdowns :glass-to-glass, hot-works and tile-patching work etc. We also boast an active army of machineries and equipment, regularly serviced and used in different projects, round the clock, throughout the year
